Overview

Mike Shiflett will host Feb 24's Power Hour and will have Five other CFIs, some well-known in the aviation training industry.

Dorothy Schick - Oregon-based CFI. A Part 61 Flight school owner for more than 26 years, a member of the Board of Directors of Society of Aviation and Flight Educators (SAFE) and a Co-founder of the FaceBook [CFI Study Group](#). This group has over four Thousand members and hosts a weekly Zoom meeting every Tuesday from 4 pm to 6 pm Pacific Time. The CFI Study Group started primarily to help tutor commercial pilots studying to become CFIs, in less than three years it has quickly become a leading "learning platform" for all levels of flight and ground instructors.

Rex Shoell - Ogden, Utah based CFI in both gliders and airplanes. He is a co-founder and co-administers the CFI Study Group on Facebook. He is EAA Chapter 58 president, VMC coordinator and Young Eagles Flight coordinator. He is also the lead representative for the SLC-FSDO FAAsteam and WingsPro. Rex is working on his CFII.

Greg Brown - Arizona-based CFI. Greg is the author of [The Savvy Flight Instructor](#) and [The Turbine Pilot's Flight Manual](#), among others. What I particularly like [about Greg](#) is that, with his vast experience, he offers up some of the best critiques and gives solid methods to improve. Greg is usually on the CFI Study Group Zoom meetings on Tuesday.

Colton Palmer - Colton is the President of the Tulsa Community College Aviation Club.

David St. George - Upstate NY based CFI and DPE. David is the Executive Director of [SAFE](#) (Society of Aviation and Flight Educators), safepilots.org. The organization represents around 6 thousand educators, including flight instructors. David's insights are always thoughtful, and his work on the SAFE app has made a difference to many CFIs. David also flies 135 charter when he can.

Mike Shiflett - Florida-based CFI and former FAA and UK CAA DPE. Mike runs CFI Bootcamp and teaches most of the academic courses there. Mike regularly gives presentations at events like Sun-n-Fun, EAA Airventure, Redbird Migration, etc. Mike also hosts the "Power Hour," an every Saturday live show from 12 pm - 1 pm Eastern time. With over 172 shows done, the venue gets guest speakers like Gary GPS Reeves, AOPA's Legal Services Division, Hobie Tomlison, SAFE, and more. Spread the word. Here is a registration page link to share with anyone you think would benefit. [Power Hour Link](#)

Have Time to Beta Test a New Product from CFI Bootcamp?

We are looking for a few beta testers for CFI Bootcamp's newest product, "CFI SmartStudy Pro." This is a complete system to study every ground area of operation in the Flight Instructor Airplane Single Engine Practical Test. It works in three parts:

1. There is a 10-30 minute audio presentation for all 26 tasks that just require you to listen.
2. Each task has a companion PDF that can be reviewed after the audio. It includes summaries, short descriptions, images, flow charts, AC reprints, and more.
3. The CFI PTS Laser Focus guide, follows the PTS element by element, tells you where the resources are, gives you reading assignments, and completes the study session.
4. If you take this on, you must complete all of the audio and be able to record any errors you find by listing the error and the time it occurred in the timeline. So you'll need something like Quicktime player to be able to see the timeline. The entire audio content is a little over 6 hours.
- 5.
6. We only have room for 5 beta testers; each selected person will receive a copy of the final product. Email mike@cfibootcamp.com, and we'll let you know if you are chosen.
