ForeFlight Plans – Choose Performance Plus

The screenshot displays the ForeFlight website's pricing page. At the top, the ForeFlight logo (A Boeing Company) is on the left, and navigation links for PRODUCTS, SOLUTIONS, SUPPORT, and COMPANY are in the center. A LOGIN button is on the right. The main heading is 'Simple Plans & Pricing'. Below this, there are three tabs: 'FOR INDIVIDUALS' (selected), 'FOR BUSINESSES', and 'FOR MILITARY OR GOVERNMENT'. A 'Select your Currency' dropdown menu is set to '\$ US Dollars'. Three plan cards are shown: 'BASIC PLUS' (\$10/month, billed annually at \$120), 'PRO PLUS' (\$20/month, billed annually at \$240), and 'PERFORMANCE PLUS' (\$30/month, billed annually at \$360). The 'PERFORMANCE PLUS' card is highlighted with a red border. Each card includes a description of its features and a 'BUY' button.

Plan Name	Monthly Price	Annual Price	Key Features
BASIC PLUS	\$10/month	Billed annually at \$120	The essentials for planning, flying, and post-flight review
PRO PLUS	\$20/month	Billed annually at \$240	Maximize situational awareness with our top safety features to fly with confidence
PERFORMANCE PLUS	\$30/month	Billed annually at \$360	Pre-built performance profiles and advanced weather visualizations for unbeatable trip planning

ForeFlight Web – Must use Web Version to Sync Folder

The image is a screenshot of the ForeFlight website's header and hero section. The background is a dark, atmospheric photograph of a small aircraft on a runway at dusk or dawn. In the top left corner is the ForeFlight logo, which consists of a white star with a stylized airplane inside, followed by the text 'ForeFlight' and 'A Boeing Company' below it. To the right of the logo is a navigation menu with the words 'PRODUCTS', 'SOLUTIONS', 'SUPPORT', and 'COMPANY' in white, uppercase letters. Further to the right are two buttons: 'LOGIN' in a white-outlined box and 'BUY NOW' in a solid blue box with white text. Below the navigation, the heading 'PERSONAL AVIATION' is written in large, bold, white, uppercase letters. Underneath this heading is a paragraph of white text that reads: 'Flying is more than a hobby, it's a lifestyle. Designed by pilots for pilots, ForeFlight delivers personal aviators an all-in-one solution for flight planning, checklists, charts, weather, airport information, flight logging, document management, hazard awareness, and more – all backed by our Fanatical Pilot Support.™' The overall design is clean and professional, with a focus on aviation-related imagery and clear navigation.

PreFlight Briefings

Teach Brief - Fly

"A complete system to teach flying using either a Part 141 or 61 Syllabus."
Second Edition

CFI Bootcamp
Flight Instruction Training

Everything you need for a Ground or Flight Lesson in One Place.
This system works in both FAR Part 61 and 141 training environment no matter what syllabus you use.

Lesson Plans

Pre-Flight Briefings

Teaching Private and Commercial Maneuvers

429 Lenox Ave, Miami Beach
Florida 33139

[Teach Brief-Fly!](#)

From Us to You!

Steep Turns

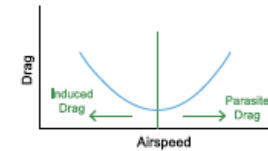

1. Clear the airspace and identify emergency landing areas.
2. Adjust the throttle to 2100 RPM - 90 KIAS.
3. Altitude no lower than 1500 feet AGL.
4. Identify a reference point in front of the aircraft and note the heading.
5. Roll into a 45 - 50 degree bank turn - Stop adverse yaw with rudder.
6. Maintain bank, altitude, and airspeed.
7. Elevator maintains altitude, throttle maintains airspeed, aileron - angle of bank.
8. Remain coordinated.
9. Begin the roll out 25 degrees before the 360 degree point - Stop adverse yaw.
10. Level the wings on the entry heading.
11. Reduce elevator to maintain altitude and decrease throttle for air-speed.
12. Roll into a 45 - 50 - degree bank turn in the opposite direction.
13. Repeat maneuver in the opposite direction.

Teach Brief-Fly!

Slow Flight

1. Clear the area.
2. Reduce the throttle to 1500 RPM.
3. Maintain altitude with elevator back-pressure as the airspeed slows.
4. Lower the flaps to full in stages. 10 degrees below 110, the rest below Vfe.
5. Anticipate elevator pressure changes.
6. Slow to 50 KIAS, and apply throttle as necessary to maintain altitude.
7. Use elevator to maintain airspeed.
8. Apply rudder to keep the to maintain heading. Keep the wings level with ailerons.
9. Perform a level 90 degree turn to the left. Additional throttle will be required to maintain altitude.
10. Perform a level 90 degree turn to the right.
11. Return to straight and level flight at cruise speed by applying full power first.
12. As the airspeed increases, retract the flaps in stages while maintaining altitude.
13. When the airspeed is 90 KIAS reduce throttle to 2100 RPM and trim.

Lift Equation

$$\text{Lift} = \frac{\rho V^2 S C_L}{2}$$

Variables we can control

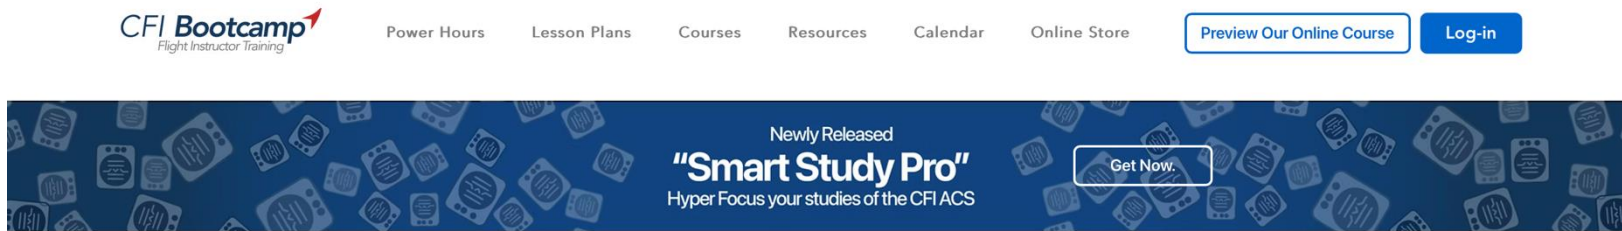

$$\text{Lift} = V^2 \times \text{AOA}$$

Left Turning Tendencies

1. Torque
2. P-Factor
3. Slipstream
4. Gyroscopic Precession (depends)
